

Press release

Stockholm 7 April 2011

Conflux supplies intelligent heating technology to T.D. Williamson.

Conflux intelligent heating technology ensures that the high quality pigging equipment made by T.D. Williamson remains fully functional in extreme environments.

T.D. Williamson Inc. is a leading international pipeline pigging products company with head office in the U.S. T.D. Williamson, Inc., the world's most recognized name in pipeline equipment and services, delivers safe integrity solutions for onshore and offshore applications.

Conflux patented innovation, throughout its intelligent characteristics, attends to that the temperature is always at optimum ensuring that component remain at full functionality. Conflux's intelligent heaters do what other heaters cannot, they automatically only heat where it's needed, when it's needed and not more than is needed.

"Conflux had the LCD heater solution best fitting our application – and they were very responsive and easy to work with."

- Eric N. Freeman, PE, Manager, Engineering & Technology Development, Pipeline Services & Pigging Solutions T.D. Williamson, Inc.

"We are proud that T.D. Williamson has chosen our intelligent heating technology. This demonstrates the strength of the technology in extreme environments."

- Arnulf von Zedtwitz-Liebenstien, CEO Conflux AB

Since 2007 Conflux has sold, produced and developed high performing flexible, semi conductive polymer heating materials. These make the basis of intelligent heating applications that are cost efficient, energy saving and environmentally friendly.
